## CUSTOM CUT FOAM

From the Automotive Industry to Scooby Doo, Global Foam Company (formerly Global Manufacturing Solutions), has been in business since 1997. Two partners designed and built their first computer-controlled foam cutting machine for cutting patterns on investment castings to within +/- .005 inches for the automotive industry.

We have since diversified and now provide custom precise-cut foam patterns and shapes for several applications: architecture, signs, concrete forms, amusement parks, decorations from wedding columns, to concrete bridge detailing, to whatever our customers will dream up tomorrow!

**Please Note: All work is CUSTOM CUT**

Global Foam Company produces unfinished items for EIFS (exterior insulation finish systems). The shapes we create can be cut from our library of files, or we can produce from customer generated ideas. Usable files include 2D and 3D CAD files, dimensioned layouts, photos, hand sketches, renderings, clip art profiles and letter fonts.

Exceeding customer expectations is our primary goal.

## CUSTOM CUT FOAM

### **Piers**

This decorative detailing for a new interchange overpass pier at I-70 and I-75 just north of Dayton, Ohio, celebrates Dayton's heritage as the birthplace of flight and its continuing role in the evolution of aviation. Global can create concrete relief forms to fit any need and any design, from abstract pattern to the detailed, realistic representations shown in the photo.

### **Bridge Panels & Voids**

For industrial or construction applications, the possibilities are endless. In this application, Global Foam Company provided the foam forms that created the elegant arches within the bridge. The bridge was built on site around the foam forms.

## CUSTOM CUT FOAM

### Highway Murals

For industrial or construction applications, the possibilities are endless. Global Foam Company provided the foam forms for of the Earth, Moon, Lunar Module and the Command Module. The Wall mural is located at I-70 and I-75 Interchange by Greater Dayton International Airport in Ohio.

### Ornamental Architecture

Whether working with individuals, new homebuilders, or restoration companies, Global Foam manufactures Concrete Forms for interior and exterior decorative ornamentation to provide special detailing appropriate to all types of applications. Contoured 3D forms for decorative architectural shapes.
